FRANCE - NORTH WEST COAST
SHEET VII
RAZ DE SEIN TO GOULVEN
INCLUDING BREST AND USHANT
FROM FRENCH GOVERNMENT CHARTS TO 1919.
Soundings in the offing in upright figures obtained by the French Government in 1891.
All Bearings are True (thus - 126°etc.) and are given from Seaward.
All heights are expressed in feet above High Water Springs.
For abbreviations see Admiralty Chart 5011.
Natural Scale 1/25000 (Lat. 48°24'N)
SOUNDINGS in FATHOMS
reduced approximately to the Level of lowest possible Low Water.
CAUTION
Ushant is extremely dangerous to approach in thick weather
The currents frequently set right on shore and within a certain distance the tides are strong.
The bottom for many miles around is so generally level, with local irregularities, that the lead is of little assistance in judging the distance westward of the meridian of the outer dangers off Ushant.
