Qual o valor da cellula animal em anatomia pathologica?

Os tecidos morbosos terão elementos anatomicos especiales?

# UNIVERSITY DISSERTATION

ON A NEW THERAPY - A MEDICAL DISCUSSION

## MEDICAL SENATORS

DEPARTMENT

OF MEDICAL PRACTICE

DOCT. A. VELASCO DE CELIANA SANTOS DE LAURENTIUS BUSTAMANTE  
-  
DOCTOR OF MEDICAL SCIENCES  
-  
OF THE UNIVERSITY OF BOLIVIA  
-  
1860

III  
Ex Anatome humana et comparata, Histologia,  
Physiologiaque generali.

## I

Ganglia nervosa certe nervosa centra.

## II

In medulla spinali aliquae nervosae fibrae rachidianaee originem habent.

## III

Ad conservanda anatomica elementa nucleus necessaria conditio.

## IV

Chylifera in villositatibus intestini etiam nunc dubia.

## V

Afferentia vasa in glandularum lymphaticarum lacunis haud aperiuntur.

## VI

Anatomica elementa tantum cellula et fibra.

## VII

Organicae functiones in cunctis animantibus similiter exercentur.

## VIII

**Ex vivisectionibus nihil certe deducere licet.**

## IX

**A nutritione magnopere distat evolutio (*crescimento*).**

**Ex Physiologia speciali, Hygieina privata, Chirurgicis  
operationibus, Pathologique generali**

I

Digestio procul dubio a vi nervosa.

II

Primi cardiaci sonitus causa praesertim in valvularum au-  
riculo-ventricularium motu posita.

III

Cordis motuum rythmus a sanguine minime pendet.

IV

Animalis absorptio physico-vitalis.

V

Quaedam sanguinis stimulantes actiones non, ut sentit  
*Cl. Robin*, acido carbonico tribuendae.

VI

Organorum nutritionem inter et sanguinem iisdem af-  
fluentem nullam servatam animadvertisimus proportionem.

## VII

Infantes, priusquam ab ubere disjungantur, aliis cibis assuefacere oportet.

## VIII

Rhinoplastia nunquam facienda.

## IX

Ex Anatome Physiologique pathologicâ futuros progressus expectat medicina.

Ex Materia medica et Pharmacia, Anatome pathologica,  
Pathologia chirurgica, Toxicologiaque

## I

Medicinalibus substantiis earumdem principia activa anteponenda:

## II

Quorum virtutes speciales insita anatomico elemento proprietas praesertim efficit.

## III

Adstringentia certe tonica medicamenta.

## IV

*Physostigma venenosum* (*Fava do Calabar*) in nervis motoribus directe agit.

## V

In curandis hemorrhagiis clavo secalino ejus aquosum extractum preponimus.

## VI

Liquida medicamina ad inhalationes praestantissima, si extreme divisa; quod sane apprime efficit *Cl. Salles-Giron* mechanicum inventum.

## VII

Tuberculis subcutaneis haud sufficit topica medella.

## VIII

Multi ejusdem naturae tumores simul erumpentes sanguineam dyscrasiam praecedere haud probant.

## IX

In aperiendis beneficiis deficiunt plerumque chemicae investigationes; aliquando etiam in errorem ducunt.

**Ex Pathologia et Therapia medica, Tocologia, Medicina forensi, Publica Hygieina, et Hippocratica doctrina.**

## I

In curandis febribus intermittentibus injectiones subcutaneas rejicimus.

## II

Circa lencocytthemiam *Cl. Bennett* sententiam non admittimus;

## III

Cujus diagnosis plerumque impossibilis.

## IV

In tractanda syphilide tertiaria ioduretum potatii utilissimum.

## V

In morbo *Brightii* d<sup>o</sup> nulla pathognomonica symptoma.

## VI

Ferri usus in chlorosi aliquoties nocet;

## LIX

## VII

Hanc inter et amenorrhream nec semper intima connexio.

## VIII

Apoplexiā cerebralem a meningea diagnoscere tam difficile quam inutile.

## IX

In curandis morbis ignis non, nisi per electricitatem, applicandus.

## X

Corticis peruvianaē usui graviditas haud contravemit.

## XI

In praxi tocologica chloroformium profecto utilissimum.

## XII

Ad debellandam eclampsiam nunquam foetus extrahendus.

## XIII

Criminationis gradus prout hominum temperamenta considerandi.

## XIV

Ad exposititos erroresque educandos et utile et necessarium colonias agricolas industrialesque instituere.

## XV

In eodem saepto nosocomii morbos dissimiles curare nouum.

## XVI

In nostrata provincia transtagana praecipue sylvarum inopia populorum incremento obstat.

## XVII

Ante vigesimo quinto aetatis anno juvenes in militiam non conscribere oportet.

## XVIII

Sect. I Aphor. 21 Quae ducere etc.

» II » 45 Quicumque juvenes etc.

» III » 10 Autumnum tabidis etc.

» V » 13 Quicumque spumosum etc.
