

31/3/81. 4

I was much pleased,  
dear Professor Henrique,  
with your interesting lists of  
cryptogamic plants of  
Portugal. I mean  
while you will have  
received my list  
of *Scutellodoneae*  
of Australia, nearly  
3000 species. I have  
also forwarded to  
you by this post  
the last edition  
of my select plants.  
If a "Portuguese  
translation could

be brought out, I  
should give the  
permission gra-  
tuitously, and  
could furnish  
some additional  
manuscript notes.  
The book ought to  
be very useful in  
Portugal, and ought  
also to sell well  
in Brazil, parti-  
cularly there in the  
southern and in  
the high moun-  
tain regions. In  
all probability the  
Government of

Portugal and of  
Brazil would  
purchase a num-  
ber of copies for their  
public institutions  
of forests &c  
Respectfully yours  
J. B. Muller.

You may be aware,  
that the Govern-  
ment of India  
published an  
edition of the  
"Select plants"  
in Calcutta last  
year.
