

ROYAL BOTANIC GARDENS,

KEW, SURREY.

DIRECTOR'S OFFICE.

31 July 1967

My dear Colleague,

I am glad to be able to inform you in continuation of my letter, dated 19 inst. that the missing packet containing the three specimens advised in your letter of 13 June last, was delivered here by the post office authorities yesterday, 30 July.

The packet, I observe, bears the date 13 June, so that it was clearly taken charge of at your end at the same time as your letter, and there is nothing to explain why your letter should have been delivered here on 25 June while the packet was not delivered until 30 July - five weeks later!

Seu Prof. Dr. J. A. Henriques
Jardim botânico
Universidade de Coimbra
Portugal

However, the satisfactory thing is that the packet has not, as feared might have happened, been lost.

Dr Stapf has now examined the three specimens and I take pleasure in enclosing his report upon them.

With compliments and the assurance that we are always at your disposition in matters of this kind

Believe me to be

Yours sincerely,
D. Prain
