It is very gratifying to me, dear Prof. Henriques, that you offer, to translate the "select plants" into the Portuguese language, an honor which I greatly estimate from so distinguished a servant as yourself. It seems to me, that if the Department of pub-

take a few hun-

for placing such

the Government,
the printing could
be rendered remu-
nerative, as there
should be a sale

however be aware,
that the venerable

whether this French

purposes also in
your country and

in Brazil, where

on these two points,
I will be happy
to contribute £20

and will besides
purchase some
