

Charlton House,
New England.

3. 12. 02.

Dear Sir,

In working through
the European ~~rare~~ herbaria
for my monograph of
the Fungus Family
Erysiphaceae - published
as vol. IX of the Memoirs
of the Torrey Botanical

I should be most pleased
to look over and
determine ~~if~~ any
Portuguese or Spanish
Erysiphaceae.

I trust you will
kindly excuse the liberty
I take in applying to
you, but I know of

no one else to whom to

apply.

I think also that
you may have perhaps
some Erysiphaceae in
your herbarium.

I am working regularly
(though privately) at New
Herbarium; — so that all
specimens sent on loan
will be perfectly safe,
as they will be kept there.

Yours sincerely,

F. D. Salmon.

(New York)

Club, I was not able

at the time to see

much material from

Portugal or Spain.

I take the liberty now

to ask you if you

could kindly tell me

where the best Cryptogamic

herbia of these two

countries are to be found.
