

S. Tomé - 23 de Setembro de 1917

Ex.^{ma} Sr.^a Doutor J. J. Heuripus:

Five pelo

último vapor o posto de receber o postal de
V.^a Sr.^a Fiquei com uma certa péna do
pouco interesse que opina a "Hém d'aujourd'hui"
tinha. Também já estava de umas interes-
sado. Nessa altura já tinha mandado
p.^a o comê: um frasco com umito fru-
to em vários graus de desenvolvimento e
flores em gliceria. Também já tinha
preparado e posto a secar em umas
trinta exemplares de folhas e flores.

Com vista do que me diz, estes já são V.^{os}.
Na verdade o fruto poderia uma tinta
que lembra a da baba de sobrepau.

A pipiã gliceria que me os meti de se a-
ficar azul ou preta.

Estou curioso pelo livro de V.^a Sr.^a Sr. Tomé.

Se quiser de mandar mais alguma coisa
de mais, deipente sempre do que se subministra
com umito de mais, de V.^a Sr.^a
quando me amiz e obrigado

Amant. Costa

1. The first part of the paper is devoted to a general survey of the subject.

The second part is devoted to a detailed examination of the various aspects of the problem.

The third part

is devoted to a discussion of the various methods which have been employed in the study of this subject.

The fourth part is devoted to a discussion of the various results which have been obtained in the study of this subject.

The fifth part is devoted to a discussion of the various conclusions which have been reached in the study of this subject.
