

Aug. 13. 77

My dear Sir

In a letter dated 14/7/77
= 14 July, 77 you mentioned
having sent us some plants
by post as an experiment.

I find that the last we
received from you was on
May 22. This consisted
of a packet of 11 species.

You refer in your letter to
some specimens of Boetes
and Mr Baker of our
Herbarium has written you
the enclosed note respecting
your difficulties.

We should be very glad
to receive copies of your
drawings of Portuguese
fungi and I have no

doubt that we could get
them determined for you.

Believe me

Yours faithfully

W. T. Whiston Dyer
